

play equipment

Tunnel hill slide 30° , H 3,00 m

item number

941001715**product description** (page 1)

Please note that in the area of the flange at the slide's seat a suitable surface for flanging (wooden platform or planks, concrete foundation or similar) must be provided by the customer.

Slide segments made of stainless steel are welded together to form a one-piece slide and are particularly quiet due to their tubular trough shape.

Course: straight

Including slide support post made of stainless steel tube Ø 120 mm, stainless steel mounting flange.

Please note for your planning that due to the possible heating of the slide surface, stainless steel slides are aligned to the north-east or stand in the semi-shade of trees.
