

play equipment

**Wide slide (2,20) with starting platform
0,20**

item number

041842701**product description** (page 1)Posts

Posts made of laminated robinia wood, cylindrically milled, Ø 120 mm. Unprotected end grain areas are covered with non-detachable post caps made of stainless steel.

Posts flush with the platform are closed with welded-on stainless steel caps.

Steel support post made of stainless steel for the foundation and elevation of robinia roundwood posts, Ø 120 mm, below the play level.

Platform

Platform made of robinia slats, 30 mm thick and surrounding squared timber beams 45 x 100 mm. The dried sawn timber from robinia is planed, chamfered and free from rotting branches. Floor fixing by special stainless steel angles and a continuous bolt connection.

Attachment parts

Attachable wide slide, 1.10 m wide, one-piece stainless steel construction, sheet thickness: 2.5 mm, with roll-off preventing fall protection

Please note for your planning that stainless steel slides are aligned to the north-east or stand in the semi-shade of trees due to the possible heating of the slide surface.

Metal components: stainless steel. The robinia wood is provided with a water-repellent, breathable protective coating. In addition to protecting it from moisture, this treatment reduces cracking. The modular add-on parts transfer their forces directly into the posts via a special adapter attachment. The screw connections are secured against unauthorised loosening by means of cover caps.
