

play equipment

Hill slide (2,50) with starting platform 0,20

item number

041865501**product description**

(page 1)

Posts

Posts made from stainless steel tubes Ø 120 x 3 mm covered by non-detachable protective stainless steel caps. Upper ends of posts level with platforms are covered by welded-on circular blanks made from stainless steel.

Platform

Platform from boards of 30 mm thickness and all-round square-shaped joists 45 x 100 mm. Dried timber from Robinia, planed, milled and free from decay. Force-fitting fastening through specific stainless steel brackets with end-to-end bolt assembly.

Attachment parts

stainless steel attachment slide, one-piece welded assembly, stainless steel sheet thickness: 2,5 mm, with roll-off prevention above the entrance section. Stainless steel slide support for the curved section. Sliding course curved at 36° to the left.

For your planning, due to a possible sliding surface heating, please see to a north-east orientation (northern hemisphere) of the slides or provide half-shade of trees.

For countries in the southern hemisphere, see to a south-east orientation.

Metal components: stainless steel

Robinia timber is furnished with water-repellent, breathable protective coating. Besides protection from moisture, that treatment reduces crack formation. Thanks to a specific fastening adaptor, forces arising from the modular attachment parts are directly derived into the posts. Tamper-proof screw connections thanks to screws with security socket.
