

play equipment

Hill slide (3,50) with starting platform 0,20

item number

041875501**product description**

(page 1)

Posts

Posts made from stainless steel tubes Ø 120 x 3 mm covered by non-detachable protective stainless steel caps. Upper ends of posts level with platforms are covered by welded-on circular blanks made from stainless steel.

Platform

Platform from boards of 30 mm thickness and all-round square-shaped joists 45 x 100 mm. Dried timber from Robinia, planed, milled and free from decay. Force-fitting fastening through specific stainless steel brackets with end-to-end bolt assembly.

K&K Hill slide

Sliding sections from stainless steel, low noise level thanks to trough-shaping, one-piece welded assembly.

Stainless steel support post for the curved sections.

Course: curved section to the right 36°, curved section to the left 36°

For your planning, due to a possible sliding surface heating, please see to a north-east orientation of the slides or provide half-shade of trees.

Metal components: stainless steel

Robinia timber is furnished with water-repellent, breathable protective coating. Besides protection from moisture, that treatment reduces crack formation. Thanks to a specific fastening adaptor, forces arising from the modular attachment parts are directly derived into the posts. Tamper-proof screw connections thanks to screws with security socket.
