Hill slide (4,00) with starting platform 0,20

item number

041880701**product description** (page 1)Posts

Laminated Robinia timber Ø 120 mm with cylindrical milling. End-grain surfaces are covered by non-detachable protective stainless steel caps.

Stainless steel tubular pedestal for concrete-cast foundation and for fixed mounting to round Robinia posts, Ø 120 mm, below playing surface.

Posts flush with platform level are made from stainless steel, covered by welded round plates.

Platform

Platform from boards of 30 mm thickness and all-round square-shaped joists 45 x 100 mm. Dried timber from Robinia, planed, milled and free from decay. Force-fitting fastening through specific stainless steel brackets with end-to-end bolt assembly.

Hill slide

Sliding segments made of stainless steel, welded to a two-part slide for transport reasons, including flange connection at the point of separation for easy assembly by screwing on site. Stainless steel support post for the curved sections.

Course: curved section to the left 27°, curved section to the right 54°, curved section to the left 27°

For your planning, due to a possible sliding surface heating, please see to a north-east orientation (northern hemisphere) of the slides or provide half-shade of trees.

For countries in the southern hemisphere, see to a south-east orientation.

Metal components: stainless steel

Robinia timber is furnished with water-repellent, breathable protective coating. Besides protection from moisture, that treatment reduces crack formation. Thanks to a specific fastening adaptor, forces arising from the modular attachment parts are directly derived into the posts. Tamper-proof screw connections thanks to screws with security socket.
