

1. Assign location of sand play table considering the space requirement.
2. Excavate soil for foundation, according to drawing.
Please note: To achieve maximum stability and a safe installation, a moderate level of soil solubility is required.
3. Put post into hole of foundation and align with spirit level.
4. Grout foundation with compressed concrete C20/25, chamfer and round off the edges.
All items with a CFH of less than 600 mm and, furthermore, all equipment that is meant to be installed as play item on a playground need to have a minimum space free of obstacles and measuring 1.50 m from outer edge of item (according to EN 1176-1).
5. Release for play after concrete foundation have set.
6. Check all screw connections after one month, and if necessary screw down again.
