

1. Assign a location for the equipment considering the space requirements. For a safe use of the effect disc, a surrounding area of an extension of 1,50 m and free from obstacles must be provided.
2. For wall holder assembly, refer to the sketched layout of the rear part or use it as a drilling jig. Keep in mind both a total weight of 75 kg and a possible additional load of the same weight caused by a user who intends to hang from the disc. Fastening material is not included with delivery.
3. The installation height recommended is at 1,60 m (disc centre).
4. **Attention: For fastening the effect disc, the screws slightly have to be lubricated with installation paste!**
Connect outer flange ring and effect disc with six safety screws M8x20-A2 and six washers ϕ 8,4-A2.
5. Check all screw connections according to maintenance instructions after 4-5 weeks and retighten, if necessary.

Please ensure that all special tools (e.g. Allen key for secured Allen screws etc.) and all specific documents which are or may be useful for safety management (e.g. invoice, delivery note, order acknowledgement, installation instructions, maintenance instructions) are forwarded to the persons responsible .
